

STRENGTH VISIBILITY & VENTILATION

WHERE YOU NEED IT MOST

ALL-WELDED CONSTRUCTION

Offering strength, visibility and ventilation in an easily installed, exceptionally durable package, ASI Storage Solutions' Angle Iron locker system is ideal for harsh environments including:

- Athletic and fitness facilities
- School locker rooms
- Daily public-use lockers
- And other similar applications

CREMONE LATCHING SYSTEM

The cremone latching system provides extra security by using the principles of a fulcrum to transfer the rotary motion of a handle-turn into the vertical actuation of two positive-action locking bolts that engage with the frame at the top and bottom of the door, and a center latch engaging at the side.

The specially constructed solid angle iron frame provides the robust structural integrity needed to protect belongings in rough environments. The diamond-stamped ventilation holes assure the free flow of air, to reduce odor build-up and full visibility of locker contents.
